Career Objective

I'm a game developer passionate about combining programming with creative development. I love the entire process of game development, from graphics and gameplay mechanics to the code that makes it work. Building games combines my technical skills with creative problem-solving, and I find it rewarding to see projects come together into experiences people can interact with.

Technical Skills

Game Development (Unreal Engine, GDScript)

- Developed a 3D VR project in Unreal Engine 5.6, implementing custom shaders, atmospheric systems, and interactive mechanics
- Participated in multiple game jams creating 2D games using various engines and frameworks
- Experience with both front-end and back-end game programming, creating gameplay mechanics and user interfaces

3D Modeling & Animation (Blender)

- Created complete 3D character models from concept to final implementation
- Developed rigging and animation systems for game-ready characters
- Built 3D environments and assets for integration into game engines
- Experience with texturing, shading, and lighting for 3D scenes

Programming Languages

- C++: Used for Unreal Engine development, low-level game programming, and applied computer science
- GDScript: Game development in Godot engine
- HTML/CSS: Front-end web development and UI design
- Processing: Creative coding and visual programming

Graphics & Visual Design

- Custom shader development for lighting and visual effects
- Computer graphics programming and rendering techniques
- 2D asset creation for game development
- Digital artwork and animation
